

JANKIBEN PARMAR

OH, USA | jankiparmar357@outlook.com | +1 (937) 260-6122 | LinkedIn | GitHub | Portfolio

Summary

Software Engineer with 4+ years building RESTful and GraphQL APIs with Node.js, plus React front-ends and AWS-based CI/CD pipelines. Delivered scalable microservices handling 3x transaction volume and cut API latency by 35%. AWS Certified, with hands-on experience in Docker, GitHub Actions, Agile, and Gen AI-assisted development across cross-functional, multi-stakeholder teams.

Education

Wright State University, Dayton, Ohio, United States

Dec 2023 – Jul 2025

Master of Science in Computer Engineering

GPA: 3.0/4.0

- Relevant Coursework: Machine Learning, Distributed Computing, Artificial Intelligence, Quantum Computing, Advanced Computer Networks, Advanced Software Engineering, Cloud Computing, .NET, Angular, Node.js

Charotar University of Science & Technology, Gujarat, India

Jul 2016 – Jul 2021

Dual Degree: Master of Computer Applications, Bachelor of Computer Applications

GPA: 4.0/4.0

- Relevant Coursework: Data Structures and Algorithms, Database Systems, Data Mining, Information Systems, , Object Oriented Programming, Operating Systems

Professional Experience

Software Engineer

Feb 2026 – Present

Aeronace Consultancy Services LLC

Sheridan, Wyoming, United States

- Architected full stack platforms using React/Next.js and Django/Node.js on AWS (Lambda, EC2, S3) with Terraform IaC cutting deployment inconsistencies by 40% and reducing release cycles from days to hours.
- Designed and deployed distributed microservices and event-driven backend jobs using Python, enabling scalable processing of 3x previous transaction volume with zero additional infrastructure.
- Owned PostgreSQL schema design end-to-end — optimized queries, restructured indexes, and implemented automated debugging to bring average API response time down by 35%.
- Collaborated in Agile sprints to decompose features into user stories, maintained CI/CD via GitHub Actions, delivering features 25% faster with zero production rollbacks.
- **Skills:** React, Next.js, TypeScript, Node.js, Django, Python, REST APIs, PostgreSQL, MongoDB, AWS (Lambda, EC2, S3), Terraform, Docker, CI/CD, GitHub Actions, Agile

Software Engineer

Oct 2025 – Feb 2026

NovaHire Tech Solutions Inc.

Sarasota, Florida, United States

- Built and maintained full stack web applications using React, Node.js, and TypeScript improved page load times by 20% and reduced UI bug reports by half through targeted performance optimizations.
- Designed a Python-driven automation layer using agentic workflow frameworks, eliminating repetitive processes and cutting manual sales operations effort by 20% within the first month.
- Implemented containerized deployments using Docker and managed CI/CD pipelines via Drone/GitHub Actions — standardized environment configs reducing deployment debugging by 3-4 hours per cycle
- Participated in sprint planning and feature decomposition, writing acceptance criteria and collaborating with QA to ship production-ready features on schedule every two-week cycle.
- **Skills:** React, TypeScript, Node.js, REST APIs, Tailwind CSS, AWS (Lambda, EC2, S3, CloudWatch), Docker, Terraform, CI/CD, GitHub Actions, Agile

Assistant Professor and Software Engineer

Aug 2021 – Dec 2023

Charotar University of Science & Technology

Gujarat, India

- Streamlined billing and payments microservice using Python and FastAPI reduced API call latency by 30% and eliminated 95% of pipeline downtime due to usage exhaustion.
- Built and optimized high-availability billing microservice using Python and FastAPI with distributed event processing reduced API latency by 30% and eliminated 95% of pipeline downtime.
- Delivered full stack data solutions integrating JWT Authentication, REST APIs, and FastAPI backend services to support 1000+ end users across cross-functional teams.
- **Skills:** Python, FastAPI, REST APIs, JWT Authentication, PostgreSQL, SQL, ETL Pipelines, Microservices, AWS, Agile

Projects

AI-chat-assistant (Live Demo | GitHub)

Jun 2025 – Aug 2025

- Full stack real-time chat app using React/TypeScript and Node.js/Express backend with JWT auth, WebSockets, and REST APIs deployed on AWS; implemented TDD with RSpec-style testing patterns.

EzShopping: Shopping Assistant (Live Demo | GitHub)

Jan 2025 – May 2025

- Full stack e-commerce platform with React frontend, FastAPI backend, PostgreSQL database, and scalable REST API endpoints for product-to-query matching with documented system architecture.

Employee Management Portal | Personal Project (GitHub)

Jan 2024 – Apr 2024

- Built a full-stack web application using C#, ASP.NET Core MVC, Angular, TypeScript, and SQL Server for employee onboarding and attendance management.

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, Java, Kotlin
- **Backend:** Node.js, Express.js, FastAPI, Django, .NET, Spring Boot, REST APIs, GraphQL, JWT, Microservices
- **Frontend:** React.js, Next.js, Angular, Vue.js, HTML5, CSS3, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, SQL, MongoDB
- **Distributed Systems:** Kafka, Event Streaming, Distributed Computing, WebSockets
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform
- **AI & ML:** TensorFlow Lite, Prompt Engineering, Gen AI Integration, Agentic Workflows

Research Publications and Certification

- **Facial Expression Recognition: A Study and Its Counterparts:** Published in International Journal of Marketing and Technology, Vol. 13 Issue 02, February 2023.
- **AWS Certified Cloud Practitioner:** Issued April 2025, Valid until April 2028. Credential
- **Deloitte Australia Cyber Job Simulation on Forage:** Issued April 2025, Valid until April 2028. Credential
